

Interested in Seeding Native Grass?

Considering extending your grazing season??

Looking for a drought-resilient forage?

If you have been considering seeding some native forage, now is the perfect time! SODCAP Inc. is looking to cooperate with producers interested in seeding native grass on lands that are currently cultivated and located in the Milk River Watershed

Species mix includes slender wheatgrass, northern wheatgrass, western wheatgrass, green needle grass, blue grama grass, and purple prairie clover. This is a cost-share project, with grass seed supplied, and producer covering cost of seeding and establishment. Seeding to take place this year.

Apply by: March 20th, 2016
